Your Realty Link — Transaction Workflow: Prospect to Paid

How a deal moves through the Agent Hub, start to finish · All agents (broker steps marked)

What this covers: the whole life of a deal in the hub — from a new lead, through the transaction file and the Closing Request, to the signed CDA and your commission statement. Each step hands its information to the next one, so you type the client and property **once**.

The one rule: start the transaction file **from the client's contact** in My Contacts (or accept the prompt when you move them to Under Contract). That link is what lets the closing request fill itself in and puts the deal on your dashboard and commission statement.

Where everything lives: Hub → My Tools → **My Contacts** and **Tasks** · Hub → Transactions & Closings → **Track Transactions**, **Closing Request**, **My Commissions**. Contracts and signatures still live in **Dotloop**.

1 Prospect | 2 Work the client | 3 Under contract | 4 Run the file | 5 Request closing | 6 Broker CDA | 7 After closing | 8 Get paid

At a glance

what you do vs. what the hub does for you

STAGE	WHERE	YOU DO	THE HUB DOES AUTOMATICALLY
1 · Prospect	My Contacts	Add your own prospects	Website leads the broker routes land in your contacts (and on your pipeline) + you get an email
2 · Work the client	My Contacts	Move them through the pipeline, log activity, set follow-ups	Follow-ups show on your Tasks board and daily email
3 · Under contract	My Contacts	Click **Open file** on the prompt	Creates the file, loads your checklist & key dates, links it to the client, invites the client to their portal
4 · Run the file	Track Transactions	Check off the checklist, fill in dates, add parties & docs	Checklist items → Tasks board · key dates → Calendar
5 · Request closing	Transaction file	Click **Request closing**, add BLC #, submit	Fills in address, client, date, price, commission and title company; shows your estimated net
6 · CDA Broker	Admin → Closings	Broker reviews, signs, generates	Calculates your split, cap and fees; creates the CDA PDF; adds the deal to your dashboard
7 · After closing	File + My Contacts	Mark the file closed; move client to Closed / Past Client	Sets the buyer's home anniversary; adds 1-week, 30-day and 6-month check-in tasks
8 · Get paid	My Commissions	Review your statement	Breakdown, net, cap progress and printable statements

1 · Prospect

My Contacts

- **Website leads** (yourrealtylink.com) come to the broker first. The broker routes each one to an agent and picks **Buyer** or **Seller**, so it lands straight on your pipeline at *Lead*. You get an email, and the lead is already in My Contacts.
- **Your own prospects:** My Contacts → **+ Add Contact** (or Import CSV). Only a name is required.

2 · Work the client

My Contacts → Pipeline

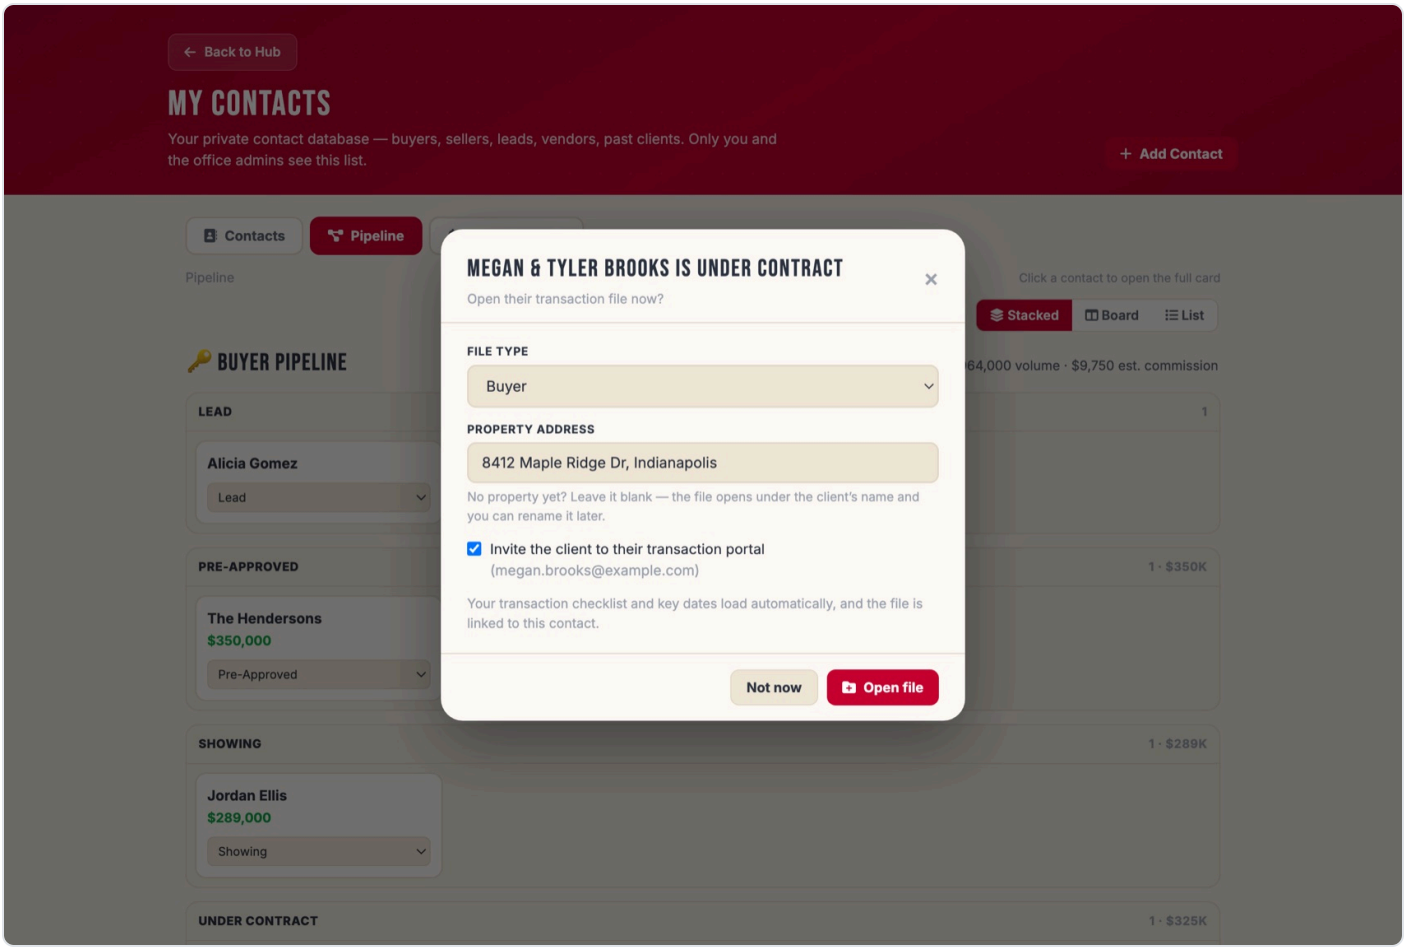

1. Open the contact and set **Buyer** or **Seller** — that puts them on the pipeline.
2. Move them through the stages as the deal progresses:
   Buyer: Lead → Pre-Approved → Showing → Under Contract → Closed · Seller: Lead → Listing Appt → Listed → Under Contract → Closed
3. Log every call, text, email and note, and set a **next follow-up** date — it shows on your Tasks board and daily follow-up email.
4. Keep **deal value** and **expected close** current. The Closing Request uses them later to fill in price and commission.

3 · Under contract → open the transaction file

one click

1. Move the client to **Under Contract** (from the pipeline or on their contact card).
2. The hub asks **"Open their transaction file now?"** Check the file type and property address (sellers fill in from their address; buyers type it in — or leave it blank if still searching).
3. Leave **Invite the client to their transaction portal** checked if they should follow along, then click **Open file**.

Automatic: the file is created with your YRL checklist and key dates, it's linked to the client, and the client gets their portal invite. Clicked *Not now*? Use **+ Start file** on the contact's Transactions card any time.

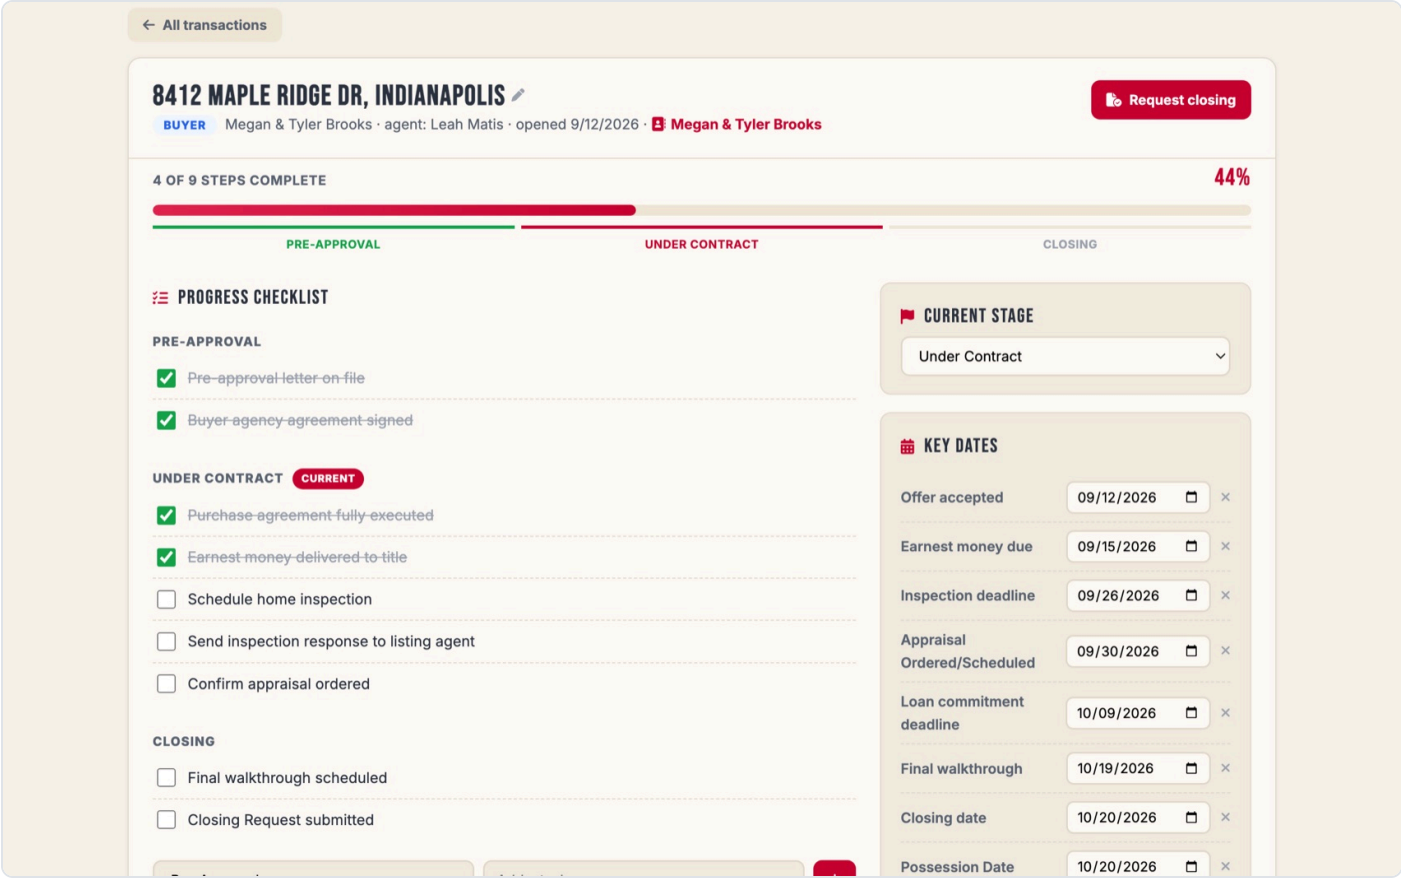

Moving Megan & Tyler Brooks to Under Contract — the hub offers to open their file, already linked to them.

4 · Run the file

Transactions & Closings → Track Transactions

1. **Checklist:** check items off as you go. The progress bar and stage tracker update automatically, and the current stage's open items also appear on your **Tasks** board.
2. **Current stage:** move it forward as the deal progresses (Pre-Approval → Under Contract → Closing).
3. **Key dates:** fill in inspection, appraisal, loan commitment, walkthrough and **closing date** — they show on your Calendar and Tasks board.
4. **Parties:** add the **title company** (name + email), lender, co-op agent. The title company fills in on the Closing Request later.
5. **Documents:** upload to keep them with the file; mark which ones the client can see. Contracts and signing stay in **Dotloop**.

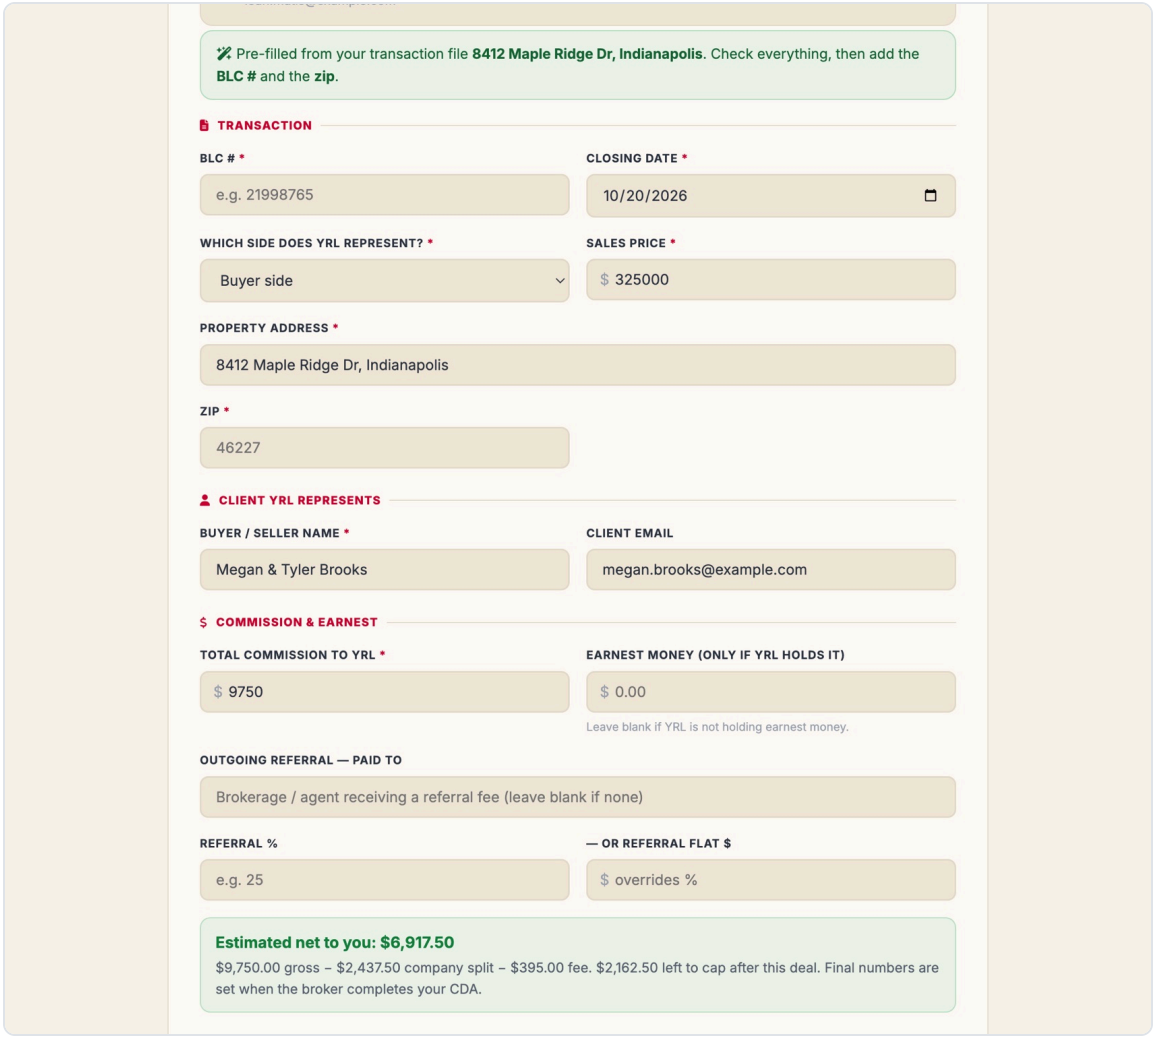

*The transaction file. Top right: **Request closing**. Next to the file details: the linked client — click it to jump to their contact.*

5 · Request the closing

from the top of the transaction file

1. Open the transaction file and click **Request closing** (top right).
2. The Closing Request opens **already filled in** — address, side, client name & email, closing date, sales price, total commission and title company. The green note tells you what's still missing (always the **BLC #**; for buyers usually the zip).
3. Add any **outgoing referral** (brokerage + % or flat $). Check the **Estimated net to you** box — it uses your commission plan and cap.
4. Check everything and **Submit**. Also send the Closing Request through **Dotloop** as usual, with Janet as **Managing Broker**.

One per file: once submitted, the transaction file shows the closing's status. If anything changes, contact the broker — agents can't edit a submitted request or the CDA.

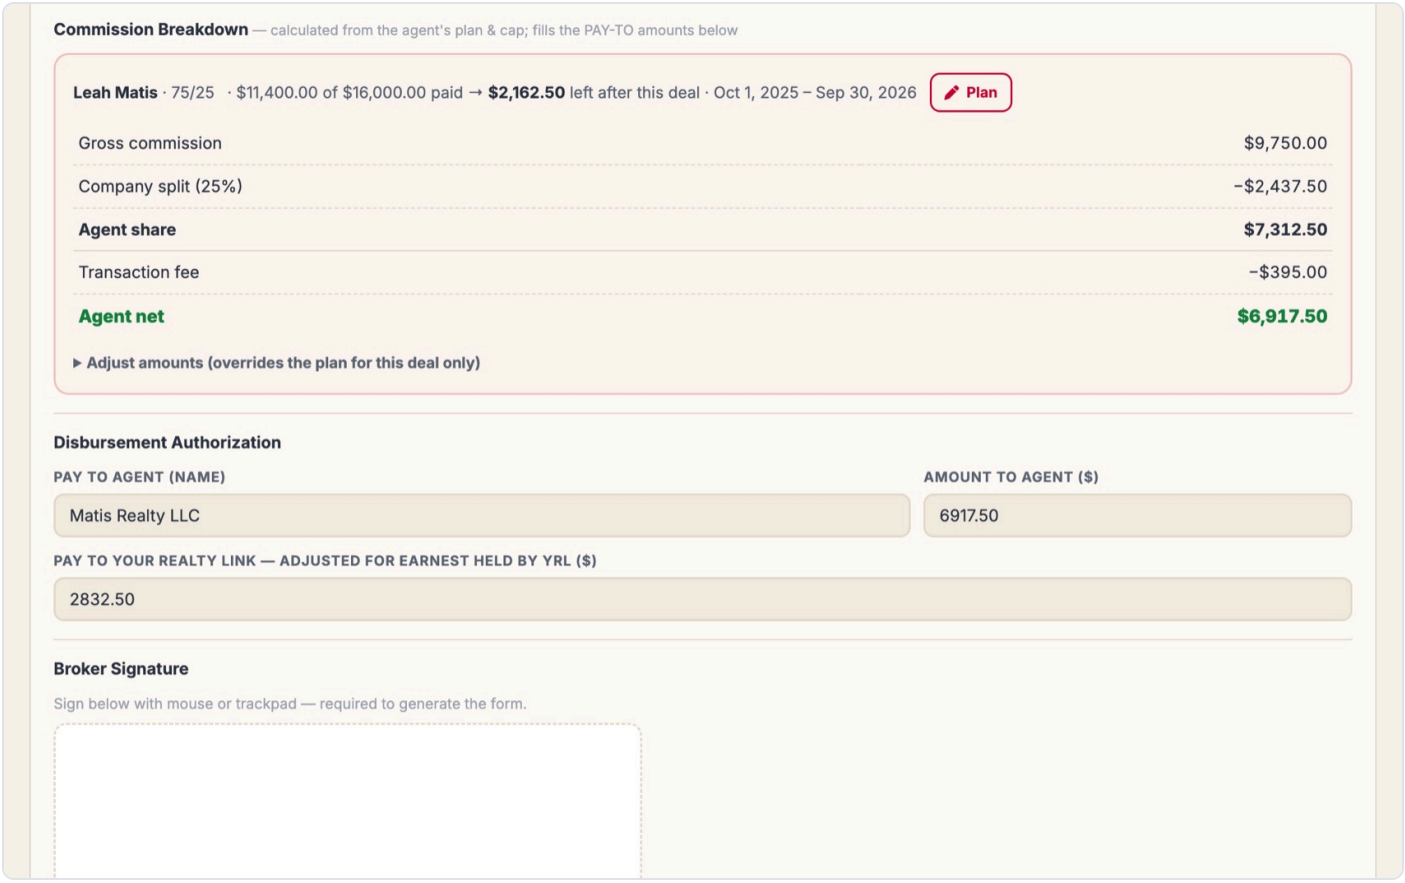

The Closing Request opened from the file — pre-filled, with the estimated net at the bottom.

6 · Broker completes the CDA

Broker only · Admin → Closings

1. Open **portal.yrlagent.com → Admin → Closings** and click **Prepare CDA** on the new request.
2. Check the closing details (anything the agent entered can be corrected here).
3. Review the **Commission Breakdown** — calculated from the agent's plan and where they are on their cap. Need a one-off change? Use *Adjust amounts* (flagged as adjusted on the statement).
4. The PAY-TO amounts fill in from the breakdown (agent paid to their LLC if they have one). Sign and click **Generate & Complete CDA**.

Automatic: the CDA PDF is created (page 2 is the agent's commission statement), the deal counts toward the agent's cap, it's added to their dashboard GCI, and their transaction file shows **CDA completed** with a View CDA link.

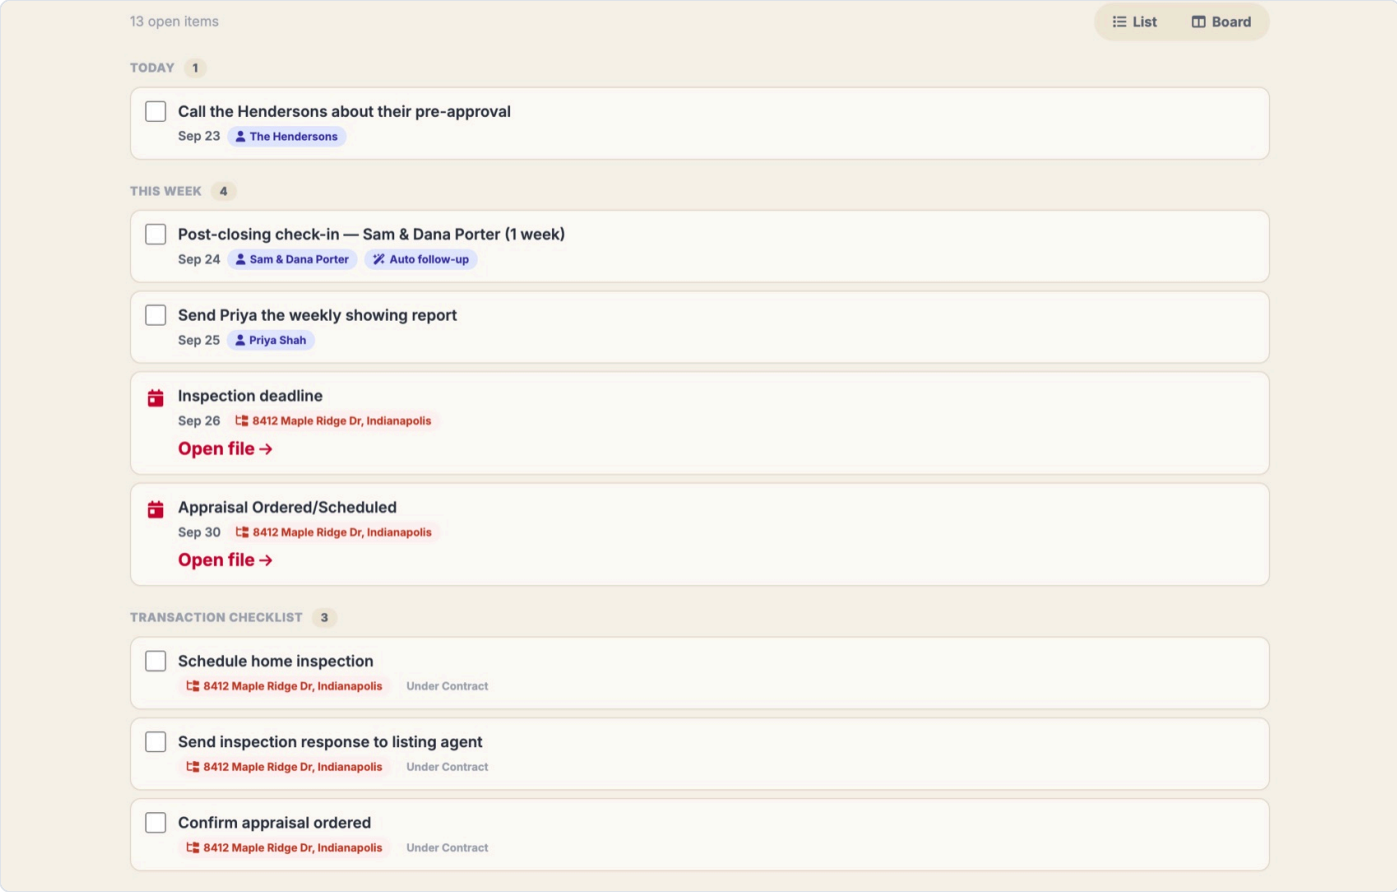

The CDA builder: the split, cap and fees are calculated for the broker, and fill the disbursement amounts.

7 · After closing

two quick clicks + automatic follow-ups

1. On the transaction file, click **Mark file closed** (it appears once the CDA is completed).
2. In My Contacts, move the client to **Closed** and change their type to **Past Client**.

Automatic: buyer clients get their **home anniversary** set to the closing date (it shows on your calendar and in your daily email every year), and three **Auto follow-up** check-ins appear on your Tasks board — **1 week, 30 days and 6 months** after closing.

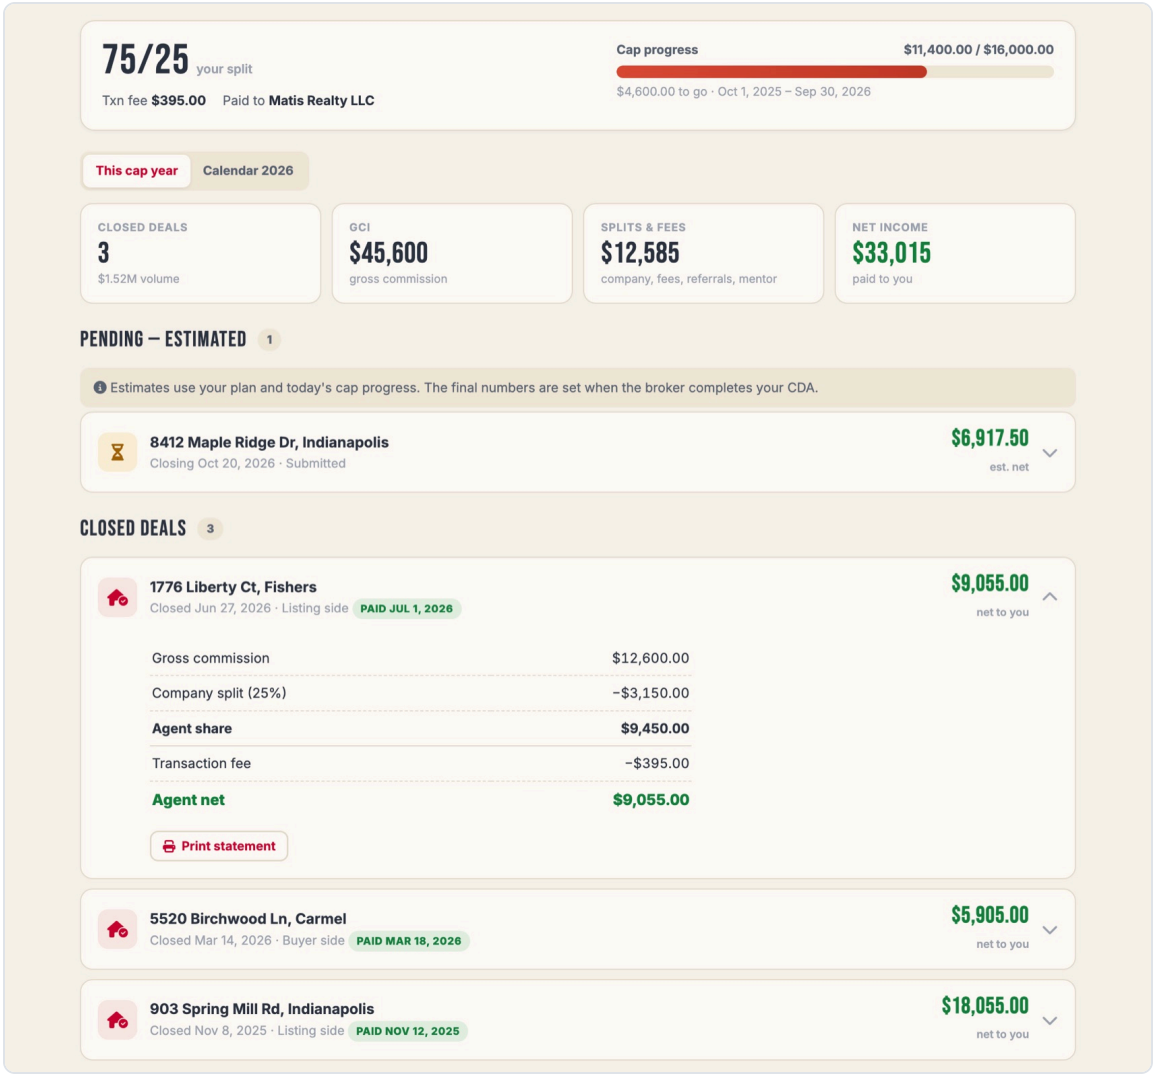

Tasks: an auto post-closing check-in, file deadlines, and the current stage's transaction checklist — all in one list.

8 · Get paid

Transactions & Closings → My Commissions

- The broker records when the title company paid YRL and when you were paid.
- **My Commissions** shows your split and **cap progress** for the cap year (**Oct 1 – Sep 30**), your GCI and net income, pending deals (estimated) and every closed deal's full breakdown — company split, referral, mentor, fees and net.
- Open any deal for its **CDA** or **Print statement** for your records.

My Commissions: cap progress, totals for the cap year, a pending estimate and each closed deal's breakdown.

Good habits: start every file from the contact · keep deal value & expected close current · add the title company to the file early · submit the Closing Request as soon as you have a closing date.

If something looks wrong: a missing field on the Closing Request means the file or contact doesn't have it yet — fill it in there next time. Numbers on your estimate don't match what you expected? Ask the broker to check your commission plan. Anything after you submit goes through the broker.
